Indexed Document Notes

project_brief.txt: PFA 2026 Document Intelligence Pilot

project_brief.txt: The pilot team is based in Casablanca, Morocco.

project_brief.txt: The assistant supports documents in English, French, and Arabic.

project_brief.txt: The project turns uploaded documents into searchable knowledge.

project_brief.txt: A user chooses a storage provider, adds a document and metadata, then starts a queue.

project_brief.txt: The pipeline uploads the file, extracts its text, and indexes the result.

project_brief.txt: A vision model can help with difficult scanned pages when ordinary extraction is not confident enough.

project_brief.txt: Once a document is indexed, users can ask questions grounded in its content, filter retrieval using document metadata, revisit saved chat sessions, and inspect the document library.
